

NH1 Solder Wire

Interflux® NH 1 is an activated no-clean colophony free and lead-free solder wire that gives fast and repeatable soldering results on a wide range of surfaces including brass.

**Recommended
for:**

**ROBOT
SOLDERING**

Laser Soldering
Hand Soldering

Fast Wetting

Low Spattering

**Low soldering
tip contamination**

NH1 has a lower and more transparent residue compared to most solder wires on the market.
